

# Label and tape application

Our systems are designed to meet the rigorous demands of the automotive industry by delivering consistent quality. From labeling complex parts to applying adhesive tapes for secure assembly our solutions optimize productivity while ensuring exact standards of precision and reliability.

## Level of Automation

- Fully automated systems
- Semi-automated machinery
- Single or multi-robot cell
- In-line or standalone

## Our equipment provides

- Precise alignment and application of labels and tape on critical components, improving product quality and accuracy
- High-speed application capabilities that reduce cycle times
- Reliable performance, even in challenging conditions
